

Safety Manager

Our construction firm takes safety seriously, and we require all our employees to use the standard industry practices to keep everyone safe on the job. To that end, we're seeking an experienced Safety Manager who can evaluate the safety protocols followed on various job sites, organize safety training for employees and report problems to management. The ideal candidate will have experience in the construction industry (particularly commercial construction) and understand the specific safety issues inherent to construction sites.

This position's duties include but are not limited to:

- Visit job sites to conduct safety audits on personnel, equipment and materials
- Evaluate, assess and alter safety procedures and policies for the benefit of employees and clients
- Research and implement new materials handling processes
- Analyze accident reports and evaluate injury case studies based on available facts
- Prepare and conduct safety training sessions for employees and vendors
- Ensure compliance with all regulatory bodies and standards (including OSHA, EPA, etc.)
- Research environmental regulations and policies and institute changes to ensure compliance
- Track incident metrics and apply findings
- Oversee the applications for and receipt of necessary permits
- Lead injury and incident inquiries and evaluations

Required skills for this position include:

- Bachelor's degree required (preferably in environmental health and safety)
- 6+ years' experience in the construction industry
- Knowledge of OSHA and EPA standards regarding construction
- CHST Certification preferred
- Ability to train, influence and motivate team members
- Some travel required (25 to 30 percent)
