<p>DECEMBER 04 Vetrotech/Saint Gobain, Amber Jones, amber.jones@saint-gobain.com</p> <p>1 AIA LU with HSW “Pushing the Design Envelope with Fire-Rated Glazing”</p> <p>Fire-rated glazing combined with fire-rated framing, provides the maximum fire protection of people and property. Flush interrupted surfaces can be achieved with a system having less vertical or horizontal framing members. Discrete joint intersections can be utilized as well, allowing the product to work with popular corner details. This allows for expansive curtain wall systems in applications that require high-span, self-supporting construction.</p>	<p>DECEMBER 11 Master Wall Inc, Jeff Knight, 541-280-8765</p> <p>1 AIA with HSW “Stucco Cladding Options 2019”</p> <p>Stucco and stucco-look claddings such as Exterior Insulation and Finish Systems (EIFS) are popular options in today’s building vernacular. This program explores how these claddings are used with the new building code requirements for energy efficiency as defined in ASHRAE 90.1 (2010) and the 2012 IECC. The program explores air barrier options as well as the new requirements for insulation and drainage options.</p>
