- Degree/License in Architecture
- 10 to 15 years of past experience in architectural practice
- Passion for design and continued education
- Strong design and project management skills
- Attention to detail
- Knowledge of software which includes: REVIT and AutoCAD

Benefits

- Competitive salary DOE
- 401k with company match
- Medical package including dental and vision
- Membership in various professional organizations
- Appreciation for your life outside of work

Key Responsibilities

Design & Documentation: Lead the creation of schematic designs, design development, and fully coordinated sets of construction documents.

Project Leadership: Manage internal design teams, delegate tasks, and mentor junior staff.

Consultant Coordination: Act as the primary liaison between the client, structural, civil, and mechanical, electrical, plumbing engineering consultants.

Code Compliance: Research local zoning ordinances, building codes, and accessibility regulations to ensure permit readiness and project feasibility.

Construction Administration: Review submittals, process RFI's, and conduct site visits to maintain design integrity and quality standards during construction.

Send resumes to apmi@apmi.com.
